

Decorate the eggs!

Can you help Ruby decorate the easter eggs with the instructions given by the computer? Every egg should look different. For the last row, can you write your own instructions?

Draw dots
Two different sizes
Use five colors

My instructions:

Algorithm

An algorithm is a set of specific steps that you can follow to solve a problem. In programming algorithms are used to create solutions to problems that can be reused, like when sorting or searching for something.

```
w w w .  
h e l l o r u b y .  
c o m
```
