

Ready, Set, Fold

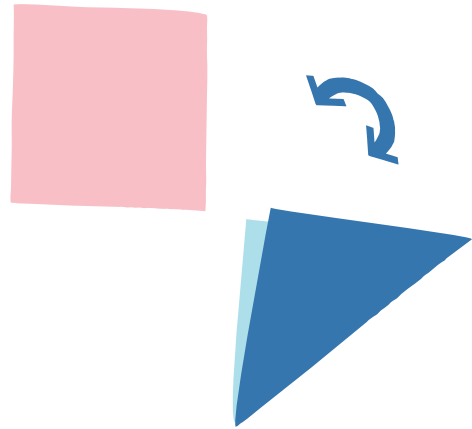

Activity
suggested
by Belén
Garrido.

Take a piece of paper and fold it in half. How many ways of doing it can you find?

What other shapes can you make? When you look at a shape, what do you see? Tell a story around the shapes.

START

Find online instructions for making a simple origami model. Notice the steps you followed when folding your model? Can you write instructions for someone else to make the same thing? Can you make a shorthand set of words and symbols that your friends could use?
